

I benefit from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am are permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. I have a 27 mile commute into East Boston. Traffic conditions can add an hour or more to my commute. Local radio stations do not broadcast traffic conditions frequently enough, or even at the times that they promise to. I rely on satellite radio traffic information.
